- *How to use the functionality and signals on the Coeus Signal Indicator*
- *How to setup alarm notifications for signals on your Coeus Signals Indicator*

How to Trade your Coeus Signals on an Exchange

Once you **receive a notification** from the Coeus Signals Indicator on **TradingView**, you'll need to then **place your order** on your preferred **Trading Exchange**. As we have customers trading Signals generated on multiple different markets, there is no one exchange that covers all options. Although we do recommend **IC Markets** which has the biggest range of market choices.

For new traders, and dependent on what **market asset** you are planning to trade, we recommend setting up an account on one (or more) of the following:
